Allowable Subject Matter

2. Claims 13, 14 and 16-24 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or render obvious a method for actuating an electromechanical parking brake device, wherein the determined mean torque value (M_{park}) is controlled with regard to a lower limit value and is set to this lower limit value when it falls below this limit value; or wherein the actuator temperature difference corresponds to the difference between the actuator temperature during the first actuation of the parking brake device or the last operation the electric motor, respectively, for generating the torque (M_{park}) multiplied by the correction factor $k_{\eta} \Rightarrow 1$ and the actual actuator temperature; or wherein for releasing the parking brake device the electric motor is actuated for a predefined period of time in such a way that a torque specification $M_{\text{rel}} = k_{\text{rel}} * k_{\eta} * M_{\text{park}}$ is satisfied; or wherein for releasing the parking brake device the electric motor is operated for a predefined period of time in such a way that its maximum torque $M_{\text{rel}} = M_{\text{max}}$ is generated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
